## **Overview**

Quran is the final testament of God preserved in its original language. It is the ultimate source of guidance revealed for human beings through Prophet Muhammad and affirms everything revealed before in the form of religious scriptures (for example, the Gospel/Bible). Being the Final Messenger of God, Prophet Muhammad practiced that guidance daily, which is reported to us as Ahadith through a chain of narrators. Building on the foundation created in Level 5, which covered various subject matters related to the Quran sciences, this course will explore various sections of the Quran, Hadith, and Bible relevant to faith and different aspects of our lives and explain those passages in a style appropriate for teenagers. This course will provide an excellent opportunity for our Muslim teenagers to build a deeper relationship with the Message of the Quran without going into the complexities of the Quranic Arabic language.

<b>Note:</b> This course does not cover the Arabic language of the Quran.
---

## **Objectives:**

At the end of this course, the students will be able to:

- Apply the knowledge gained about the sciences of the Quran in Level 5 to the selected passages of the Quran
- Build an understanding of the Quran by reading various sections in detail and asking questions
- Understand the relationship between the Quran and Hadith and how hadith should be understood in the light of the Quran
- Appreciate the fact that there is nothing wrong with reading the Bible and benefit from the wisdom that it still offers

## **Delivery Method:**

This course will be taught through various methods suitable for this age group. This includes weekly lectures, presentations, small projects/homework, and group discussions on various topics. Students will be encouraged to bring their questions to the class for clarification and discussion.

## **Course Outline:**

The following list is comprised of suggested topics for the course. The topics may be slightly adjusted based on the need of the class. Additional reading material (if needed) for each session will be available for download from Google Classroom a week before the session.

**Note:** The instructor will create a weekly lesson plan or outline *based on these topics, incorporating practical aspects of the course and exercises into the weekly lessons.*
